

First Teachers To Get Tenure

TORRANCE — Torrance Unified School District in the next few weeks faces a phase of its program which will have a marked effect on the future of the schools of this new system, and the crisis is being viewed with apprehension, it is indicated by scores of patrons of the schools who are following their progress.

For, on May 15, the first teachers of the system obtain their permanent status under the state Tenure law, if they are rehired.

Under the Tenure law, a teacher who is hired for a fourth year, after teaching in one system for three full years, becomes a "permanent" teacher in the system, and tenure can be broken only by promotion or demotion. The

teacher can be dismissed only for "cause," including conviction of a crime or immorality.

Many districts in years past have been guarding against the Tenure law by refusing to hire teachers for the fourth year.

The Torrance Board of Education has given no public indication of its attitude on the Tenure law, except that where man and wife are teaching in the system, only one will be allowed to attain permanent status.

All teachers who are completing their third year will become permanent teachers unless they are notified by May 13 that their contracts will not be renewed. It is said that more than a score of teachers are involved in this step.

Schools Hold Open House For Public School Week

TORRANCE — Public Schools week is being honored this week with open house and special programs throughout the Torrance School District.

Perry Elementary school was first to open their doors to visitors with a program Tuesday which included music by the children and an interesting talk by Jack Rouhan, district psychologist.

Programs at the other schools will be scheduled Thursday as follows:

TORRANCE ELEMENTARY
Regular P-TA meeting Thursday, April 27, 7 to 8 p. m., followed by an open house for parents with each teacher on hand

to greet those attending. Refreshments will be served.

FERN AVENUE
Open house Thursday night, April 27, 7 to 8 o'clock, followed by a P-TA meeting and square dance.

SEASIDE SCHOOL
Parent discussion groups in each classroom Thursday, April 27, from 7 to 9 p. m.

WALTERIA SCHOOL
Room teas and special programs for each room.

HIGH SCHOOL
Open house all week long.

BUS ANALYSIS

(Continued from Page One)
made to get the figures asked by the Press in behalf of patrons of the bus line.

With the edict of the people at the last election, "do not sell the bus lines, but operate them efficiently even if it takes money out of the general fund," the council now will get down to business and build a good transportation system, patrons predict.

Sam Levy, who takes an intense interest in municipal financial affairs, said yesterday that he had not studied the report completely, but in his opinion, abandonment of the Long Beach line would put the bus line in a good financial position.

It was pointed out that the profit on the Los Angeles line would easily defray losses on local lines until they are built up to a point where they pay.

The financial report said the Los Angeles line made a profit of \$12,950.00 in the period of the analysis; the Long Beach line lost \$16,183.00; local lines lost \$19,394.00.

Those interested in a good municipal bus line point out that the buses are to serve the people, and that even if a loss is suffered, it should be absorbed by the general fund.

Social For Group

TORRANCE — West Torrance Improvement Association met this week for an old-time musical social in lieu of their regular business meeting.

Entertainment for the evening included several numbers presented by the Accordionettes followed by square dancing and refreshments.

ELECTRONIC TREATMENTS

FOR

NEURITIS

THE AMERICAN WEEKLY of April 23, 1950, carried an interesting article on the use of electronics in treating neuritis, rheumatism, and similar disorders. Although the use of electronic equipment for treating nerve disorders is relatively new, the office of Dr. Larson in Torrance has used the famous Lindquist Chronowave for more than a year. This machine is reputed to have a closer approach to the human nerve impulse than any device yet manufactured.

Dr. Larson does not charge for consultation, and will be glad to explain his various methods used to relieve neuritis, rheumatism, lumbago, sciatica and many other forms of painful afflictions. Contrary to general opinion, electronic treatments are not painful and many patients feel an immediate improvement after their first treatment.

The cause of neuritis must be found and eliminated before a cure can be made. Anything done to stop the pain by suppressing symptoms will be only palliative and temporary. Therefore a correct diagnosis and treatment program is essential.

Call now for an appointment. Treatment charges are reasonable.
